About Us

AMS Informatics has rapidly emerged as a prominent player in the IT industry since its inception in 2004. Specializing in web development, internet marketing, e-commerce solutions, and more, AMS Informatics has garnered a stellar reputation for delivering high-quality projects to clients worldwide. With a track record of over 500 successfully implemented projects, serving more than 300 companies across the globe, AMS Informatics showcases its expertise and commitment to excellence in project delivery. Through its innovative solutions, tailored approach, and dedication to client satisfaction, AMS Informatics continues to solidify its position as a leading web development company in India and beyond.

Why Choose Us

Here's why AMS is uniquely positioned to be your preferred software development partner:

Tailored Solutions: We offer customized solutions for organizations of any size, providing teams ranging from 3 to 20 people to work full-time as part of your development organization. Additionally, we provide ad hoc development support for short fixed durations.

Sharing Experience: Benefit from our extensive experience in delivering over 1000 successful offshore projects. We guide you from the early concept and design stages through delivery, implementation, and post-production support.

Ready to Go: Gain access to "Ready to Go" development support services and resources, both locally and offshore, with short notice. Our offices in Australia and Europe provide easy access to permanent project management and support.

Fully Resourced: Our robust delivery capability is scalable and reliable, supported by our well-equipped and fully-resourced development facilities. By reducing our development costs, we pass on the benefits to you, maximizing the return on your IT investments.

Added Value Services: As part of our engagement, you receive access to a fully functional HR department, network support, and design studio as needed. We take complete responsibility and accountability for your projects, ensuring your intellectual property is protected and providing a transparent process.

Latest Technology: Access the latest technology skills through our highly skilled teams, regularly trained through our partnerships with technology giants like Microsoft, SUN, and Oracle. Our full-time R&D team explores new technologies and development tools, helping you build cutting-edge and cost-effective products and solutions.

Quality Focus: We maintain robust quality control throughout the development, testing, and support process using our unique delivery framework based on agile software development principles. Our highly qualified Quality Assurance teams ensure your products and solutions are reliable and robust.

We have our team of highly qualified professionals from India's leading Media Interactive companies and state-of -the-art development centre. We value our customers and offer them high quality services, experienced people and well defined processes. We are committed to make every relationship a positive and professional experience.
