## karnam

Karnam is based on a few core beliefs. At the heart of those principles is a focus on quality & comfort. The way our fabric collection is made from the different part of India to the type of needle and stitching used, We passionately define our quality standards so your pieces can be worn well and often. As our fabrics are hand spun, hand-woven in fabrics you may find variations and irregularities in the fabric, which are not necessarily quality problem, but are integral to and characteristic of hand-loom which make fabric more beautiful.
